

Instructions for Authors

Book Report Articles

Book Report articles are short articles (up to 1000 words) that are written by specialists for the general community. The aim of a Book Report article is to give a brief summary of the book's strengths and weaknesses and to evaluate the book's overall usefulness to its intended audience.

Manuscript Sections for Book Report Articles

Manuscripts for Book Report articles should be divided into the following sections:

- Title
- Author's Names and Affiliations
- Book Details
- Main Text
- Supporting Information (if any)
- Acknowledgements (optional)
- References (optional)

Title

The title of the article should be given in the form 'Review of "*book title*" by [book's Author(s)]'. For example: Review of "*What is what in the Nanoworld*" by V. E. Borisenko and S. Ossicini.

Author's Names and Affiliations

For all authors who have made substantial contributions to the work, first name, middle initial(s) and last (family) name must be provided. Below this information the institutional address should be written in a separate line in the following format: department, organization, street/P.O. box, city/town and zip code/postal code, country. If several affiliations need to be mentioned, consecutive Arabic numerals should precede the address and these numerals must also be placed as superscript after the respective author's name. At least one author must be designated with an asterisk as the person to whom correspondence should be addressed. The full name and the email address of the corresponding author(s) separated by a hyphen should be given in a new paragraph following the affiliation. Finally, the meaning of the asterisk must be explained. We also highly encourage all authors to link their ORCID record to their manuscript. During the submission process, the submitting author will now be asked to link their existing ORCID record to their manuscript, or create an ORCID record, if they do not already have one. All co-authors will also be provided a link where they too can amend this information. It is not necessary to include the ORCID iD directly in the manuscript, only in the online submission system.

Book Details

This should give the full reference to the book under review (including ISBN and number of pages). No further inclusion in the references is required. For example:

Borisenko, V. E.; Ossicini, S.

What is what in the Nanoworld, 2nd ed.

Wiley-VCH: Berlin, 2008.

XVI, 522 pages, ISBN 978-3-527-40783-5

Main Text

This section should contain the main body of the book report describing the content of the book. It may be broken into subsections with informative headings. The following questions might be considered:

- Who is the book intended for and does it meet the intended audience's needs?
- What new information does it present and how might it affect the readers' practice?
- Is the book up to date?
- What evidence does it present and how convincing is it?
- In what sort of style (i.e. popular, elegant, pedantic) is the book written?
- Is the book well organized and constructed?
- Are more or fewer figures, tables and photos desirable?
- Are there any studies, facts, or ideas the authors have neglected to consider?
- Would you like to make any further reading suggestions?
- Why should anybody read this book - or why should they not? Is it an important book?

Supporting Information

If supporting information files are provided each should be described in this section of the manuscript, providing the following information:

- a consecutive Arabic numeral in the order of the first mention in the manuscript text (e. g. Supporting Information File 1, Supporting Information File 2, etc.)
- the file name
- the file format (including the name and the URL link of an appropriate viewer if the format is unusual)
- a concise title of 15 words maximum
- optional: a detailed description of the dataset.

Additionally, supporting information files may be referenced within the body of the article to allow the creation of a hyperlink in the full text version. For example "See Supporting Information File 1" could be embedded at an appropriate place in the section "Main Text".

Acknowledgements

In this section the authors can dedicate the article to a scientist of outstanding merit or acknowledge financial support, technical assistance and other contributions or advice from persons who are not coauthors.

References

In general authors are obliged to perform literature searches and to cite original publications describing closely related work.

A complete list of all references should be provided at the end of the article with an individual reference number for each reference. All references must be numbered consecutively with Arabic numerals, in the order in which they are first cited in the text, followed by any references in tables or legends. The references should be inserted at the appropriate location in the text by writing the reference number in square brackets. Multiple citations should be separated by commas within the square brackets. In case of more than two sequential references, ranges should be given. In general a

reference should appear before a punctuation mark and not after. Reference citations should not appear in titles, headings or the abstract. Unnecessarily long lists of references are not desirable. Authors are requested to constrict the reference list to the most important or most recent references relating to a specific topic. However, all previous publications in which portions of the present article have appeared must be referenced. If references refer to a supporting information file, they should be listed at the end of that file.

The references should be presented in a style consistent with the [ACS Style Guide](#) and should not contain any form of note or comment. If automatic numbering systems are used, the reference numbers must be finalized and the bibliography must be fully formatted before submission. Web links and URLs should be included in the reference list. They should be provided in full, including both the title of the site and the URL.

Examples of the *Beilstein Journal of Nanotechnology* reference style are shown below. Please take care to follow the reference style precisely; references not in the correct style must be retyped, necessitating tedious proofreading.

***Beilstein Journal of Nanotechnology* Reference Style**

Article within a journal

1. Yang, Y. T.; Callegari, C.; Feng, X. L.; Ekinici, K. L.; Roukes, M. L. *Nano Lett.* **2006**, *6*, 583–586.
2. Constantino, M. G.; Lacerda, V., Jr.; Aragão, V. *Molecules* **2001**, *6*, 770–776.
3. Bartlett, P. A.; Green, F. R., III; Webb, T. R. *Tetrahedron Lett.* **1977**, 331–334.

Article within a journal with non-continuous (i.e. issue-based) pagination

4. Gröger, H.; Sans, J.; Güthner, T. *Chim. Oggi* **2000**, *18* (3/4), 12–16.
5. Wills, M. R.; Savory, J. *Lancet* **1983**, No. 2, 29.

Article within a journal with article number

6. Flamme, E. M.; Roush, W. R. *Beilstein J. Org. Chem.* **2005**, *1*, No. 7.

Article within a journal supplement

7. Orengo, C. A.; Bray, J. E.; Hubbard, T.; LoConte, L.; Sillitoe, I. *Proteins* **1999**, *37* (Suppl. S3), 149–170.
8. Papapoulos, S. E. *Am. J. Med.* **1993**, *95* (5, Suppl. 1), S48–S52.

Article within a journal with two separate editions or with translations

9. Grubbs, R. H. *Angew. Chem.* **2006**, *118*, 3845–3850; *Angew. Chem., Int. Ed.* **2006**, *45*, 3760–3765.
10. Šorm, F.; Holub, M.; Sýkora, V.; Mleziva, J.; Streibl, M.; Plíva, J.; Schneider, B.; Herout, V. *Chem. Listy* **1952**, *46*, 554–560; *Collect. Czech. Chem. Commun.* **1953**, *18*, 512–526.

Article within a journal with additional Chemical Abstracts reference

11. Ryzhenkov, V. E.; Molokovskii, D. S.; Ioffe, D. V. *Vopr. Med. Khim.* **1984**, *30*, 78–80; *Chem. Abstr.* **1984**, *100*, 203340s.
12. Dement'eva, L. P.; Kostikov, R. R. *Zh. Org. Khim.* **1990**, *26*, 138–139; *J. Org. Chem. USSR* **1990**, *26*, 117–118; *Chem. Abstr.* **1990**, *113*, 132046f.

In press article

13. Schwartzman, M.; Wind, S. J. *Nano Lett.*, in press.

Patent

14. Schimmel, T.; Xie, F.; Obermair, C. Gate controlled atomic switch. U.S. Pat. Appl. 20090195300, Aug 6, 2009.

Article within conference proceedings

15. Jones, X. Zeolites and synthetic mechanisms. In *Proceedings of the First National Conference on Porous Sieves*, Baltimore, MD, June 27–30, 1996; Smith, Y., Ed.; Butterworth-Heinemann: Stoneham, MA, 1996; pp 16–27.

Whole issue of a journal

16. O'Brien, P., Ed. Recent developments in chiral lithium amide base chemistry. *Tetrahedron* **2002**, *58*, 4567–4733.

Whole conference proceedings

17. Smith, Y., Ed. *Proceedings of the First National Conference on Porous Sieves*, Baltimore, MD, June 27–30, 1996; Butterworth-Heinemann: Stoneham, MA, 1996.

Complete book

18. Rao, C. N. R.; Govindaraj, A. *Nanotubes and Nanowires*; Royal Society of Chemistry: Cambridge, U.K., 2005.
19. Ohtsu, M., Ed. *Nanophotonics and Nanofabrication*; Wiley-VCH: Weinheim, Germany, 2009.

Book edition

20. Borisenko, V. E.; Ossicini, S. *What is what in the Nanoworld*, 2nd ed.; Wiley-VCH: Berlin, 2008.

Book chapter or article within a book

21. Taylor, R.; Burley, G. A. Production, Isolation and Purification of Fullerenes. In *Fullerenes – Principles and Application*; Langa, F.; Nierengarten, J.-F., Eds.; Royal Society of Chemistry: Cambridge, U.K., 2007; pp 1–14.
22. Deslongchamps, P. Amides and Related Functions. *Stereoelectronic Effects in Organic Chemistry*; Pergamon: New York, 1983; pp 101–162.

Book chapter or article within a multi-volume book

23. Farnum, M. A.; DesJarlais, R. L.; Agrafiotis, D. K. Molecular Diversity. In *Handbook of Chemoinformatics: From Data to Knowledge*; Gasteiger, J., Ed.; Wiley-VCH: Weinheim, Germany, 2003; Vol. 4, pp 1640–1686.

Chapter of a book in a series

24. Goldfuss, B. Enantioselective addition of organolithiums to C=O groups. In *Organolithiums in Enantioselective Synthesis*; Hodgson, D. M., Ed.; Topics in Organometallic Chemistry, Vol. 5; Springer: Berlin, 2003; pp 21–35.

Book with institutional author

25. Advisory Committee on Genetic Modification. *Annual Report*; London, 1999.

Thesis

26. Pfrang, A. Von den Frühstadien der Pyrokohlenstoffabscheidung bis zum Kompositwerkstoff – Untersuchungen mit Rastersondenverfahren. Ph. D. Thesis, University of Karlsruhe, Germany, 2004.
