NMR spectra and cyclic voltammograms

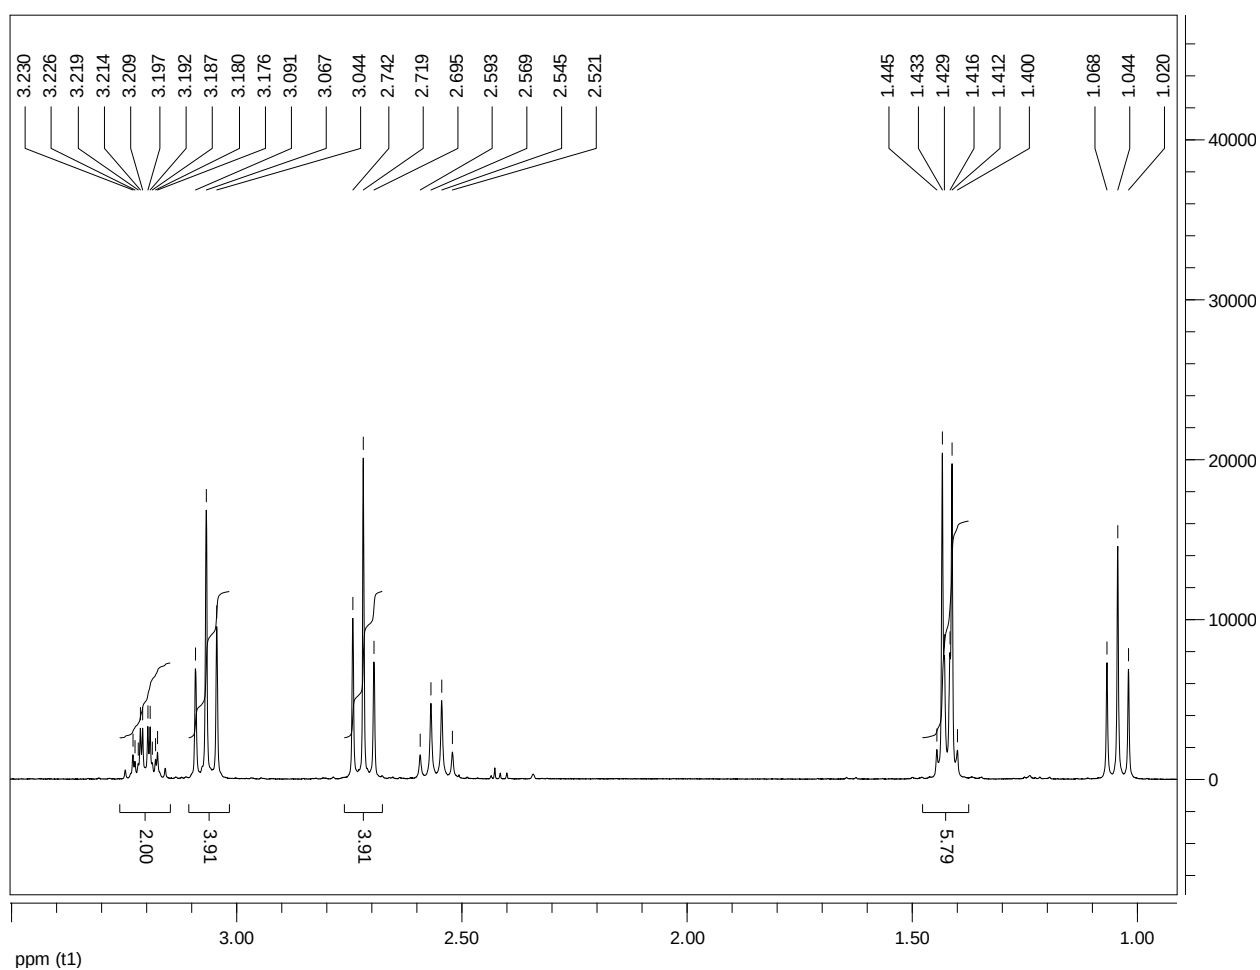

Figure S1: ¹H NMR spectrum of (S,S)-3, in CDCl₃ with triethylamine.

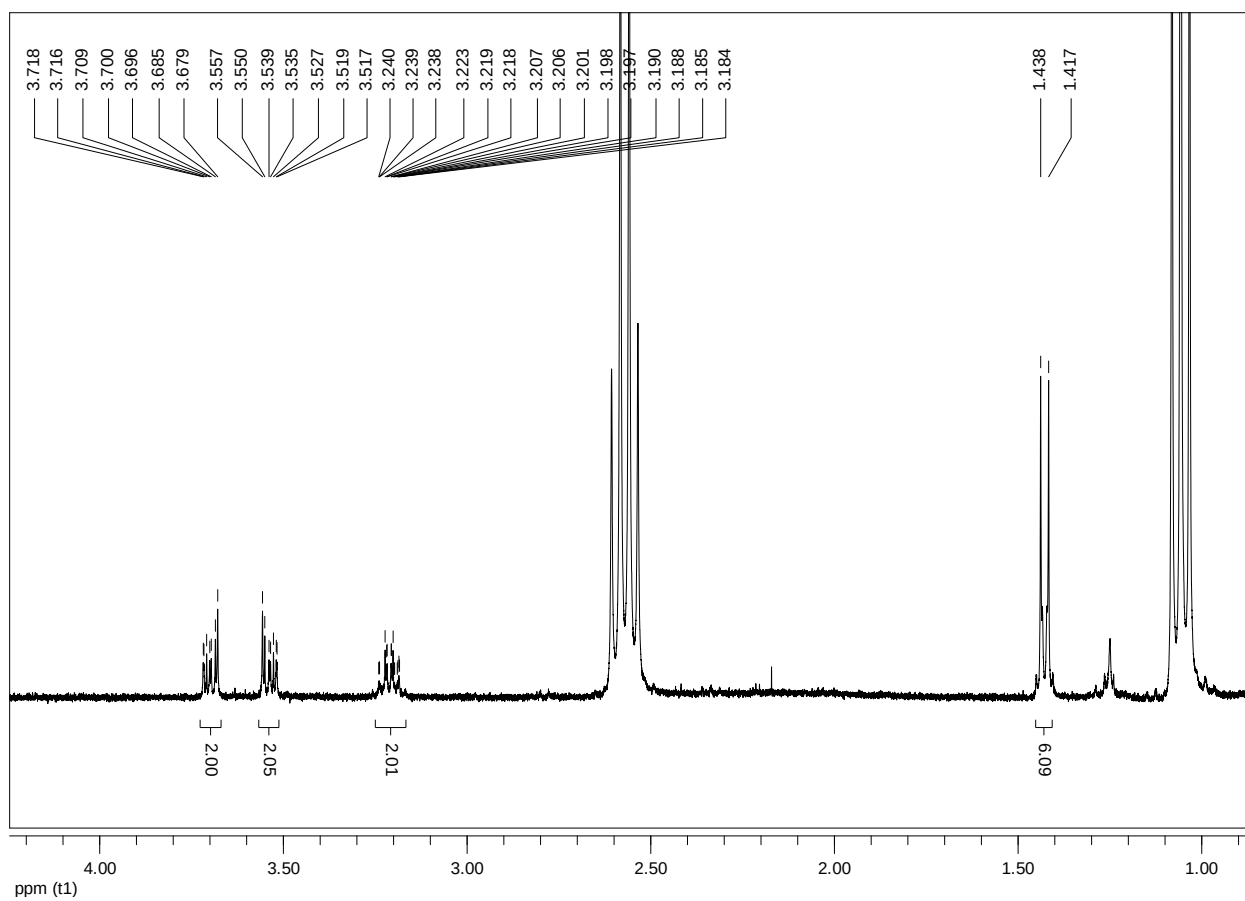

Figure S2: ¹H NMR spectrum of (S,S)-1 in CDCl₃ with triethylamine.

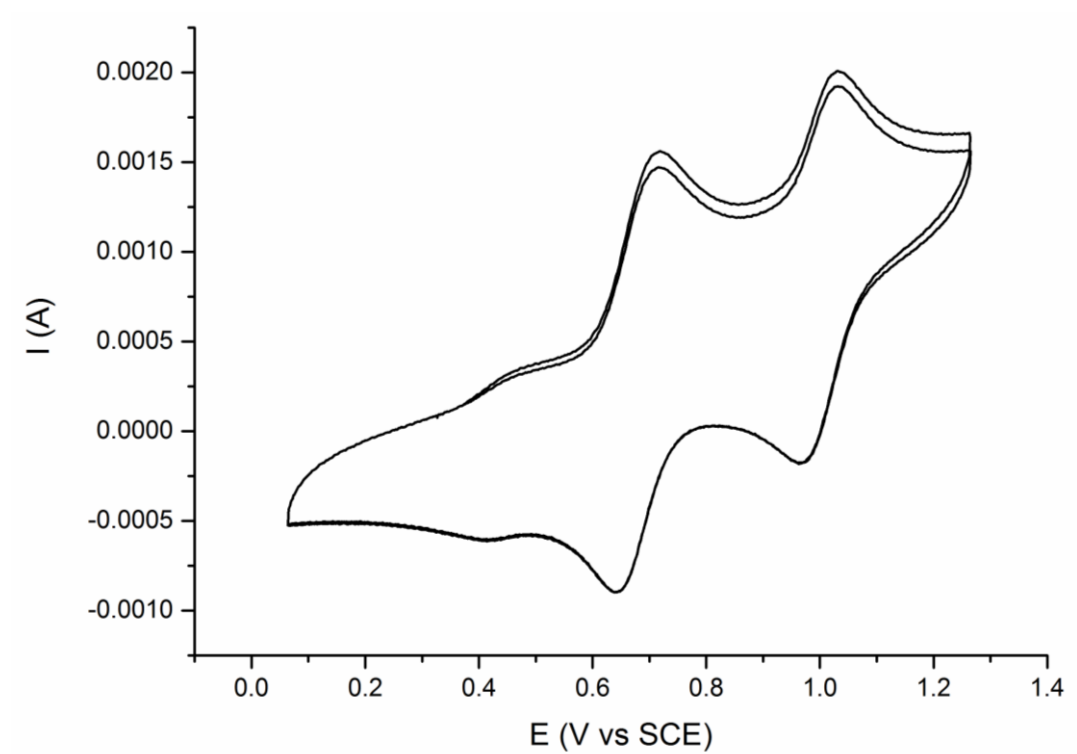

Figure S3: Cyclic voltammogram of (S,S)-**1** in 10^{-4} M in DCM/ACN 1:1. $E_{\text{ox1}}^{1/2} = 0.67$ V; $E_{\text{ox2}}^{1/2} = 1$ V vs SCE.
